TURN IT OFF BEFORE YOU TAKE OFF

Winter break is just around the corner and before everyone takes off to play in the snow, we're asking all students to do their part to reduce phantom power while the school is closed. Phantom power is the energy used by electronics even when they aren't being used. That's because they have a battery pack, a clock or other internal brain that still draws a small amount of energy even when they're not being used. With all the equipment we have in our schools this can really add up. So before everyone takes off for Winter break on Friday, we'll be asking you to "Turn It Off Before You Take Off".

Together we'll cut down on phantom power and make sure our electronics also get a break over Winter break. Thanks everyone!
